JUMBO™ Floor Pads

Steel wool products for floor maintenance and fabrication.

The Professionals Choice for:

- Stripping a tough, dirty, paste-wax build-up.
- Buffing a beautiful parquet floor to a brilliant luster.
- Crystallizing a floor to a mirror-like finish.

The **QUALITY** of the polishing, crystallizing, or stripping is superior with **STEEL WOOL** floor pads.

COMMON APPLICATIONS:

WOOD

GRANITE

MARBLE

CONCRETE

VCT

TERRAZO

TRAVERTINE

FEATURES / ADVANTAGES

Common Grades and Applications

No.0 - Fine: Cleaning, polishing, crystallizing

No.1 - Medium: Cleaning and dry scrubbing

No.2 - Coarse: Stripping floors of wax or scrubbing rough floors

No.3 - Very Coarse: Removing paint and varnish; smoothing and buffing wood floors

Stainless Steel Wool – For light colored floors or grout and concrete. Does not bleed.

- Thick and fluffy for high absorbency and minimum clogging. The fullness and springiness of these hand wrapped pads, allows it to cut through the grime quicker while providing room within the pad to absorb more of what it cuts as it cleans.
- Designed to provide maximum surface contact at the optimal angles for a mirror-like reflective finish.
- Shake them out and use over and over for cleaning, dry scrubbing, polishing or finishing almost any type of floor.
- Manufactured in diameters ranging from 7" to 24".
- Can be individually poly sealed to keep out moisture and to keep pads clean.
- They cling easily to the fiber brush on any disc-type floor machine and they're reversible for longer life.
- Designed and constructed to eliminate scratching - no welds, wire stays or stitches-provides not only the strength necessary to cut through the dirt, but the gentleness to ensure against scratching.
