TEXSTEEL™ Floor Pads

Steel wool products for floor maintenance and fabrication.

The Professionals Choice for:

- Stripping a tough, dirty, paste-wax build-up.
- Buffing a beautiful parquet floor to a brilliant luster.
- Crystallizing a floor to a mirror-like finish.

Brilliant for polishing and buffing, the needle-punched construction of the TEXSTEEL Floor Pads makes them ideal for special problems like rough or uneven floors.

COMMON APPLICATIONS:

WOOD

GRANITE

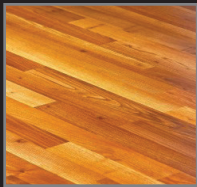

MARBLE

CONCRETE

VCT

TERRAZO

TRAVERTINE

FEATURES / ADVANTAGES

Common Grades and Applications

No.0 - Fine: Cleaning, polishing, crystallizing

No.1 - Medium: Cleaning and dry scrubbing

No.2 - Coarse: Stripping floors of wax or scrubbing rough floors

No.3 - Very Coarse: Removing paint and varnish; smoothing and buffing wood floors

Stainless Steel Wool – For light colored floors or grout and concrete. Does not bleed.

- The pads are tougher, stronger and more compact than any other pad. They won't tear, shred, fray at the edges, and have less tendency to roll or bunch up.
- Designed for maximum performance.
- Turn on the floor machine and thousands of long strands of steel fibers contact the surface at right the angle for maximum efficiency.
- Manufactured in diameters ranging from 5" to 24".
- Radial action expertly cleans, dry scrubs, buffs, wax finishes or polishes floors of every description.
- They cling easily to the fiber brush on any disc-type floor machine and they're reversible for longer life.
- Made to do the job right, economically. Priced competitively with ordinary steel wool floor pads, TEXSTEEL Floor Pads outperform and outlast even the so-called "premium" or "heavy duty" pads.
